TRAINING TABLE OF CONTENTS

Claude Certified Developer

Foundational

Duration	Session Timing	Extension
12 hours | 6 sessions	10:00 AM – 12:00 PM	2 hours | Mock-exam clinic

01 PROGRAM OBJECTIVE

Prepare participants for the Claude Certified Developer – Foundational certification through certification-aligned concepts, practical exercises, exam-style questions, and targeted revision. The program assumes participants already have AI knowledge and have access to the self-learning Claude Bootcamp.

02 DELIVERY APPROACH

Recommended structure: five 2-hour sessions (10 hours total), with content weighted toward the exam blueprint. Suggested balance: approximately 25% concepts, 50% hands-on labs, and 25% exam-style questions. An optional sixth session adds a 2-hour mock-exam clinic to meet the client's 12-hour preference.

03 SESSION-WISE CONTENTS

SESSION 1 | EXAM ORIENTATION & CLAUDE API MECHANICS		
Exam orientation	Exam blueprint, question formats, and multiple-response tactics	15 min
Messages API	Roles, system prompt, content blocks, stop_reason, and max_tokens	30 min
Streaming	Event types and handling partial output	30 min
SDK setup	Authentication/configuration and multi-turn state	30 min
Hands-on lab	Build a streaming chat client and attempt exam-style questions	15 min

SESSION 2 | INTEGRATION & MODEL SELECTION I		
Reliability	Error handling, retries, rate limits, and request IDs	20 min
Inputs and outputs	Structured outputs and multimodal/file inputs	20 min
Enterprise integration	RAG and enterprise-system integration patterns	20 min
Application interfaces	claude.ai, Desktop, API, SDKs, configuration, and observability	15 min
Model selection	Choosing models by capability, latency, and cost	20 min
Reasoning trade-offs	Reasoning/thinking trade-offs	10 min
Hands-on lab	Benchmark one task across models	15 min

SESSION 3 | OPTIMIZATION, PROMPTING & EVALUATIONS		
Efficiency	Prompt caching, batch processing, and token budgeting	25 min
Cost and latency	Scenario-based questions on cost/latency	20 min
Prompt structure	System prompts, XML tags, and examples	20 min
Context management	Long context, retrieval vs. stuffing, and compaction	20 min
Instruction/data separation	Separating instructions from retrieved data	10 min
Prompt lab	Hands-on prompt lab	10 min
Evaluation	Eval design, test sets, and debugging with traces	15 min

SESSION 4 | TOOLS, MCP & AGENTIC WORKFLOWS I		
Tool use	Tool schemas and the tool_use / tool_result loop	20 min
Tool design	Error returns and parallel calls	15 min
MCP architecture	Clients, servers, transports, tools, resources, and prompts	15 min
Hands-on lab	Build a tool loop or small MCP server	10 min
Workflow patterns	Workflow vs. agent; chaining, routing, parallelization, orchestrator-workers, and evaluator-optimizer	25 min
Agent control	Agent loops, stop conditions, and human-in-the-loop	20 min
Agent SDK lab	Hands-on Agent SDK lab	15 min

SESSION 5 | AGENTS II, SECURITY, CLAUDE CODE & EXAM STRATEGY		
Advanced agents	Subagents, memory/state, multi-agent trade-offs, and failure handling	30 min
Security and safety	Prompt injection, least privilege, credentials, tool boundaries, and guardrails	30 min
Security scenarios	Security scenario questions	15 min
Claude Code essentials	CLAUDE.md hierarchy, settings.json, skills, slash commands, and headless mode	15 min
Exam preparation	Timed mixed-domain questions, elimination tactics, and Q&A	30 min

OPTIONAL SESSION 6 | MOCK-EXAM CLINIC (+2 HOURS)		
Timed mock exam	Full timed mock exam	75 min
Review and remediation	Answer review and weak-area remediation	45 min

04 PROGRAM NOTES

- The core program is designed for 10 hours across five sessions, scheduled 10:00 AM–12:00 PM. The sixth session (mock exam) brings the total to 12 hours.
- Content and question practice should be validated against the current official certification exam guide before delivery.
- Please confirm participant eligibility for exam registration with the certification provider before finalizing the program.

STALWART LEARNING · WHAT WE OFFER

— AI for Everyone, AI for Business Teams, AI for Leaders
— AI for Developers, AI for QA, AI for Analysts, AI for Security
GitHub Copilot, MS Copilot for Office 365, Claude, Cursor, OpenAI Playground
— Cloud — AWS · Azure · GCP
— DevOps & Platform Engineering
— Data Engineering, Data Science & Analytics
— Microsoft AI Foundry, AWS AI, GCP Vertex AI, Gemini, Advanced Prompt Engineering
— Cyber Security & AI Enablement
— Full Stack & Induction training with embedded AI
— Certification Vouchers
